

Interactive Audit - Printer Friendly – Larger Print Size

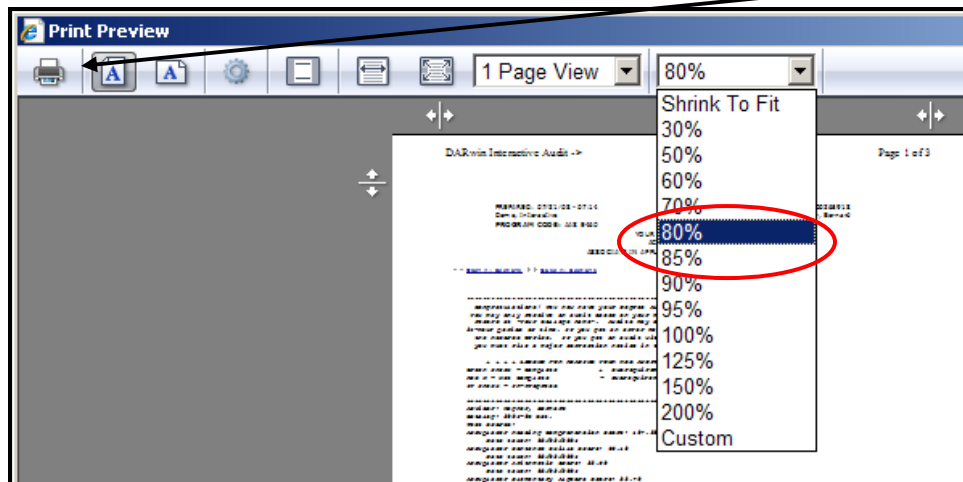

Printer Friendly audits size can be enhanced by Print Preview settings.

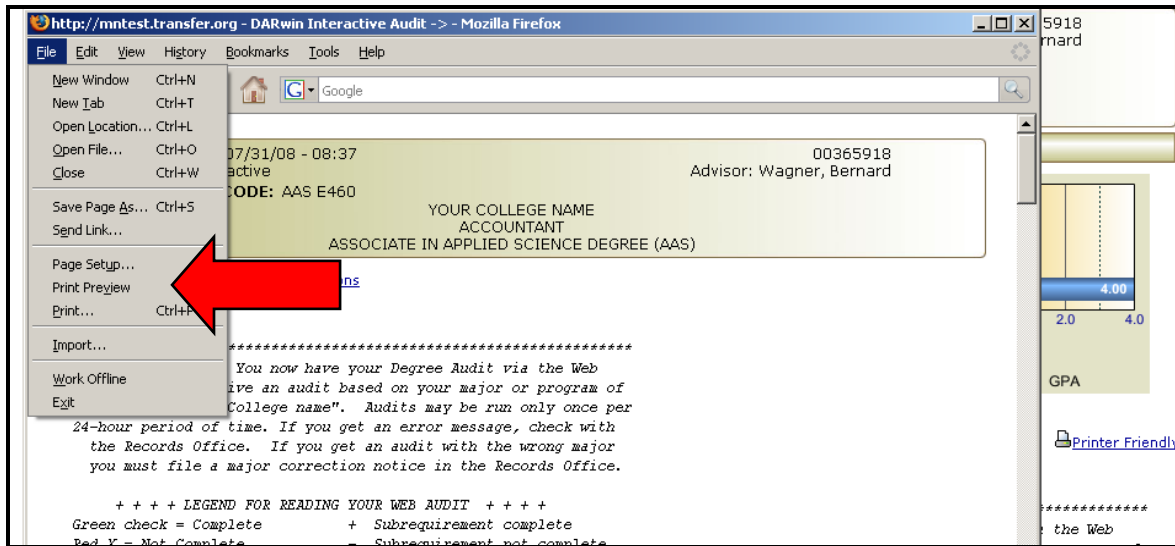

Internet Explorer Options - After clicking on Printer Friendly, a new window will open containing an audit with charts and graphs excluded. Go to File, then Print Preview.

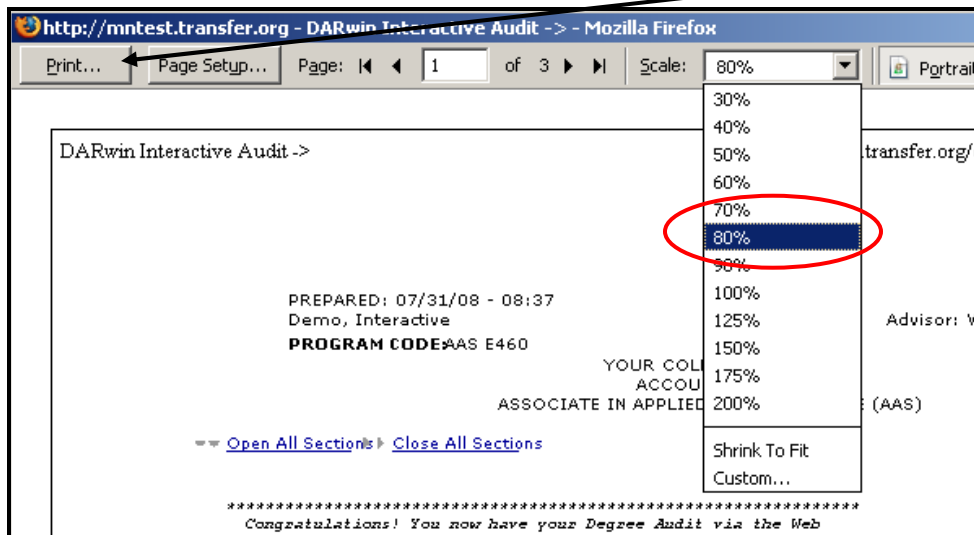

Change print size to desired print (for example - 80%), then click the printer icon.

Mozilla Firefox Options - After clicking on Printer Friendly, a new window will open containing an audit with charts and graphs excluded. Go to File, then Print Preview.

Change Scale: to desired size (for example - 80%), then click the Print button.

NOTE: Scale/size settings may need to be changed back to original settings (Shrink To Fit) when audit printing is complete, since these settings could affect other items printed from your browser.
