

NO LIST (SUB-REQUIREMENT) WORKSHEET

[Requirements>Sub-Requirement>Alternate View>Reporting Tab>Sub-requirement reporting options (NoList)]

Course report listing control flag.

Graph which follows portrays effect of NOLIST options on three areas of a reported sub-requirement:

1. Title - indicating Title text, Title/OK text and summary line normally reported with title.
2. Courses Taken - indicating courses taken by the student and applied to the sub-requirement
3. Select/Not From - indicating the Acceptable Course list and the Rejected Course list encoded for the sub-requirement - generally preceded by the default text: SELECT FROM and NOT FROM.

A blank field value will be replaced by the NOLIST value from the requirement itself as specified for the requirement's NOLIST field above. Specific sub-requirement control option values are:

' ' = normal processing - all components of the sub-requirement: the title lines, the courses taken by the student, and the NOT FROM/SELECT FROM lines, are all reported prior to the requirement being completed. Once the requirement is complete, only the courses taken by the student will continue to report.

NOTE: Courses taken and used to satisfy this sub-requirement which would normally list when the requirement is met, may NOT list IF REUSE = 'R' or 'Y' (refer to COM.LISTREUSE). To force a listing, use NOLIST options 'C' or 'L'.
