

Instructions for installing u.achieve in CAP server environment:

Installing the u.achieve client from MnSCU MOVEitSecurely website:

- Log into website using your StarID/password

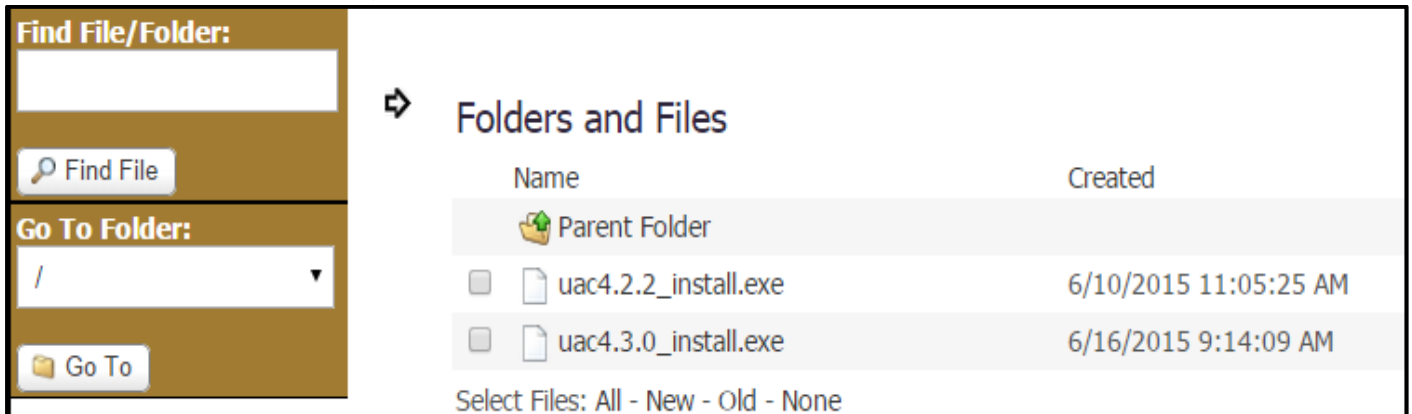

<https://moveitsecurely.mnscu.edu/>

- Click on 'Go To Folder'

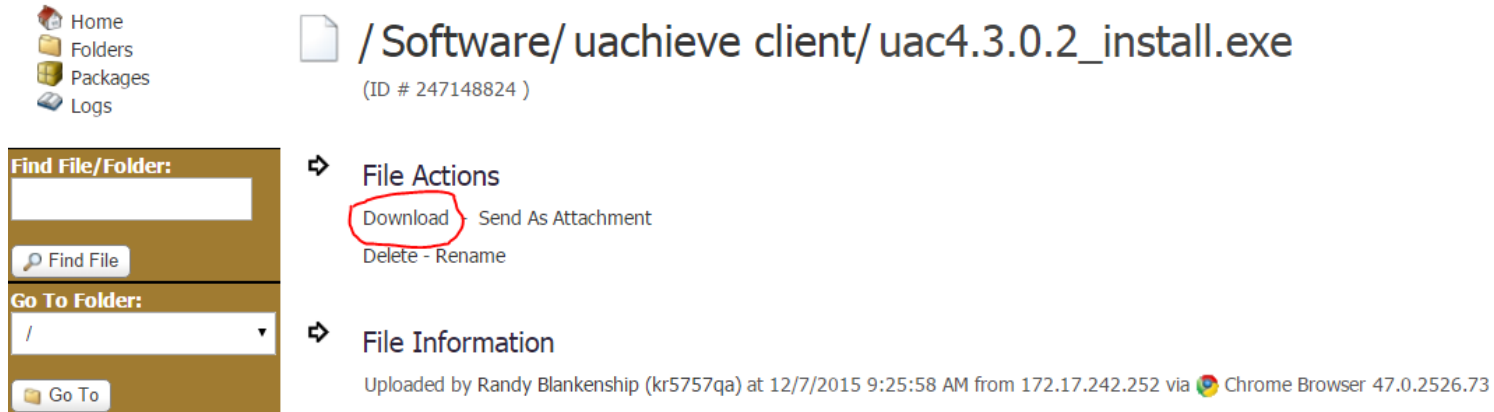

- From the dropdown – select '/uachieve client'

You should see something similar to this:

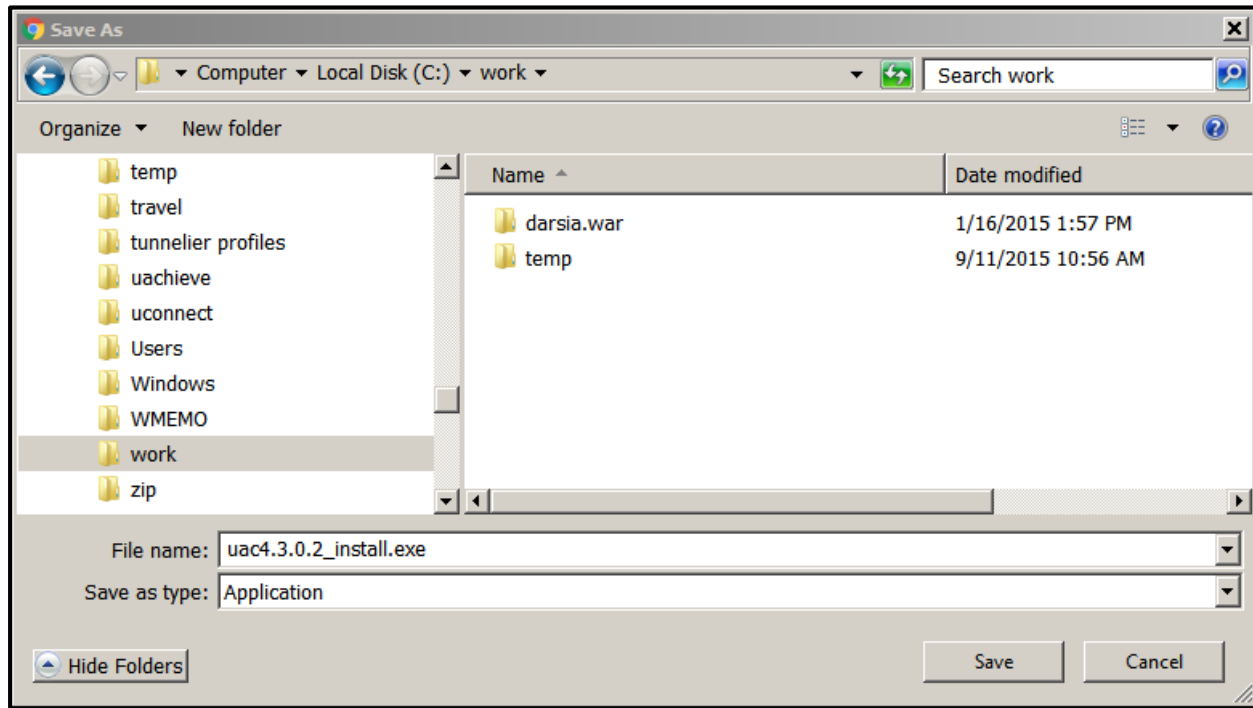

- Click on the actual filename – **uac4.3.0.2_install.exe**

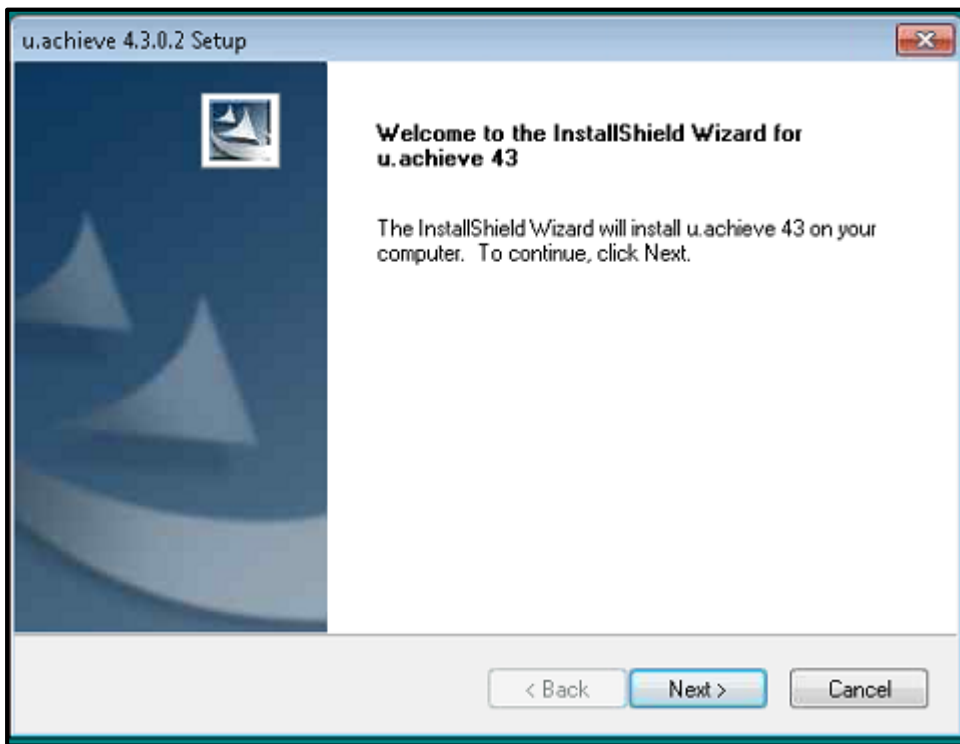

You will see a screen similar to this:

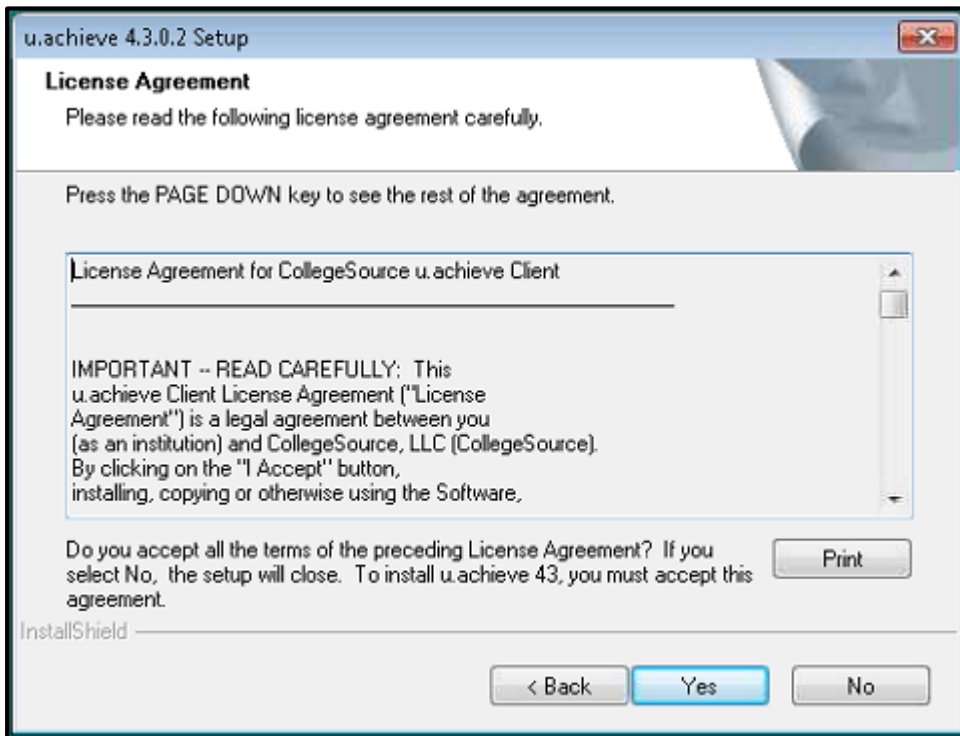

- Click on 'Download' – and save the file to someplace local

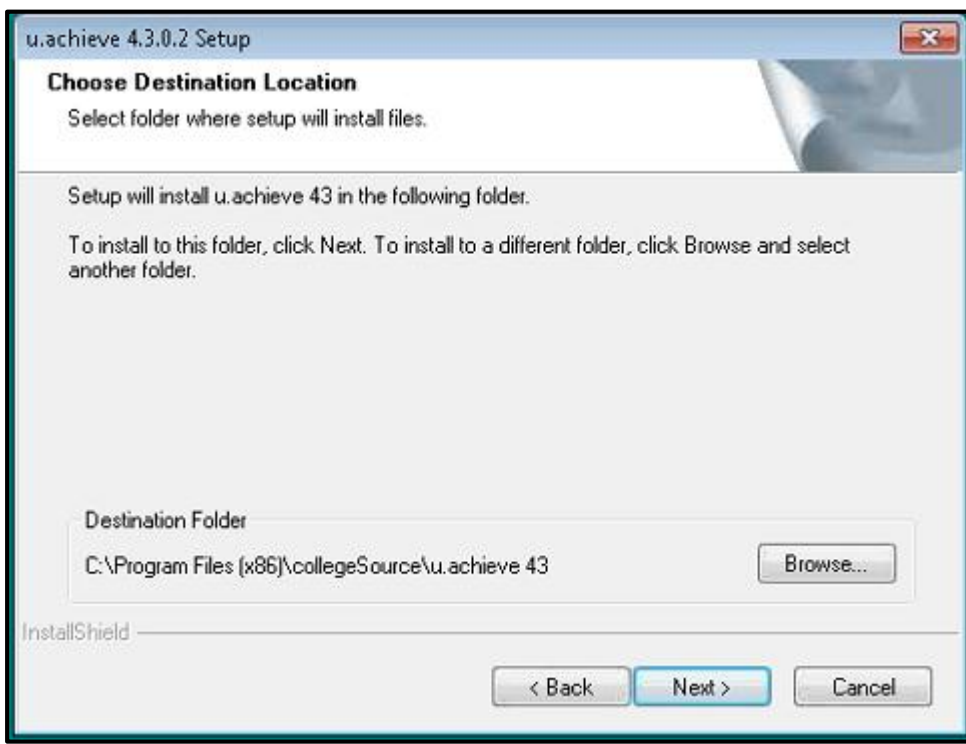

- When the save is finished – 'run' the install exe;

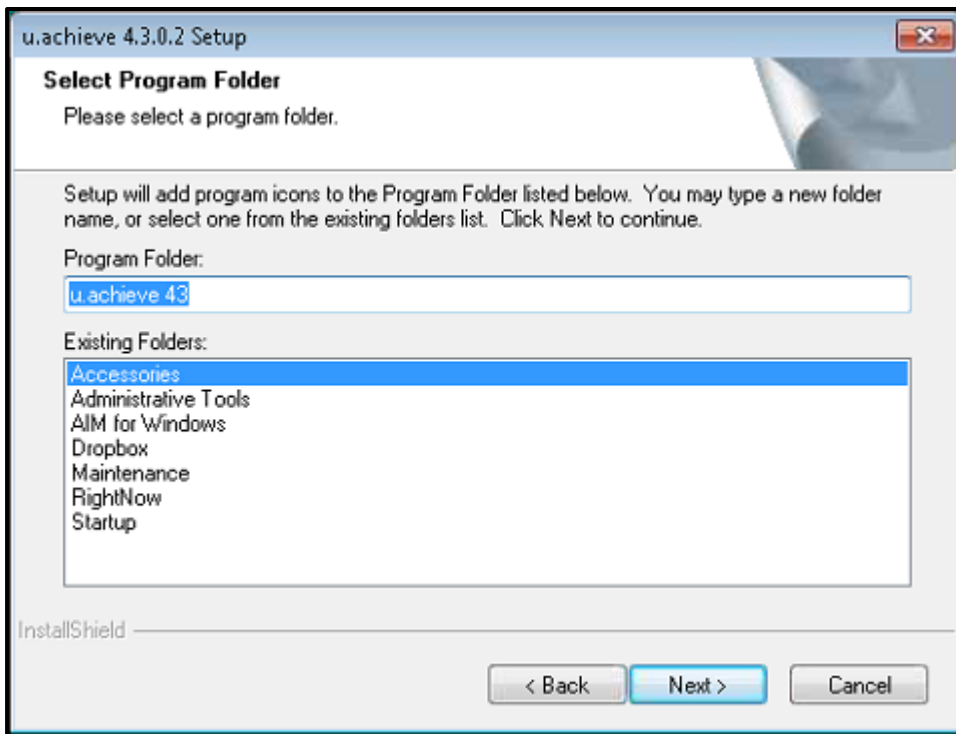

- Select 'Next'

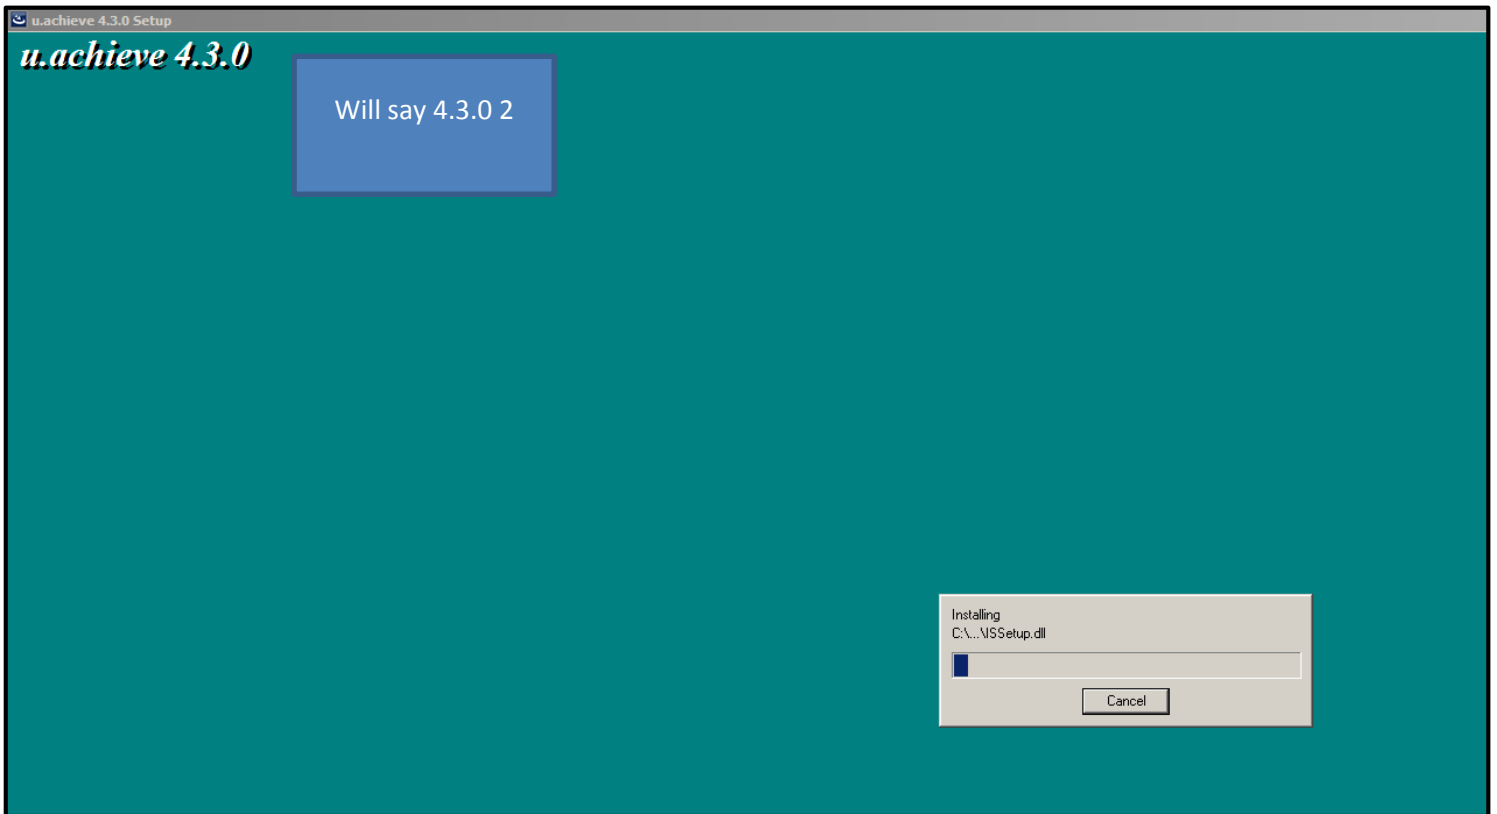

- Select 'Yes'

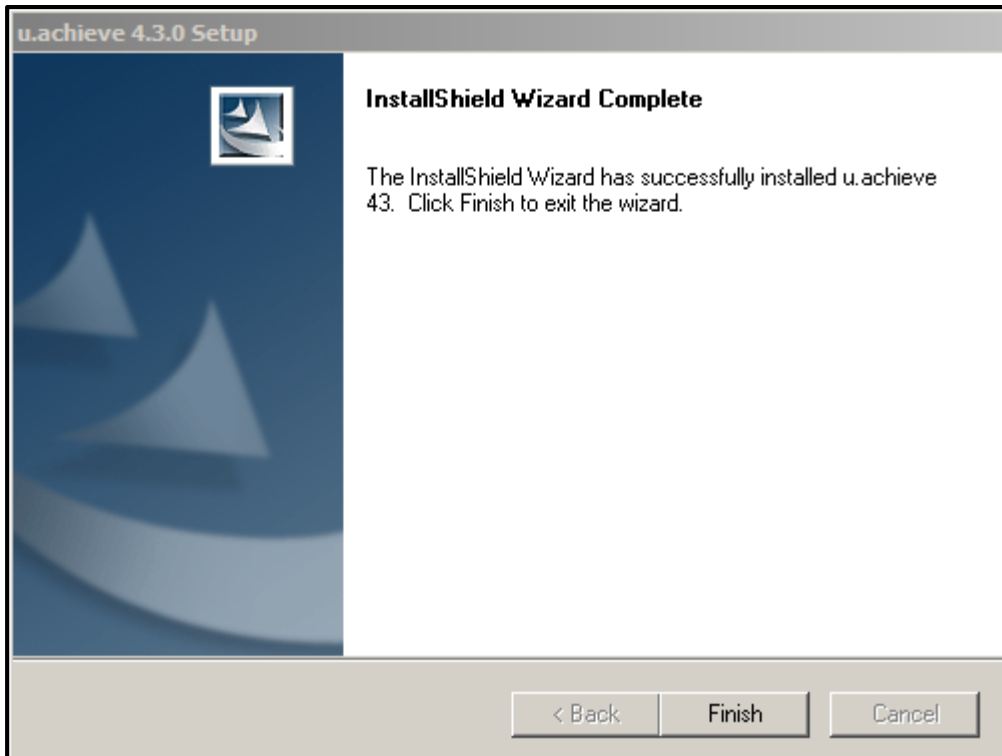

- It is best to accept the default location – Select 'Next'

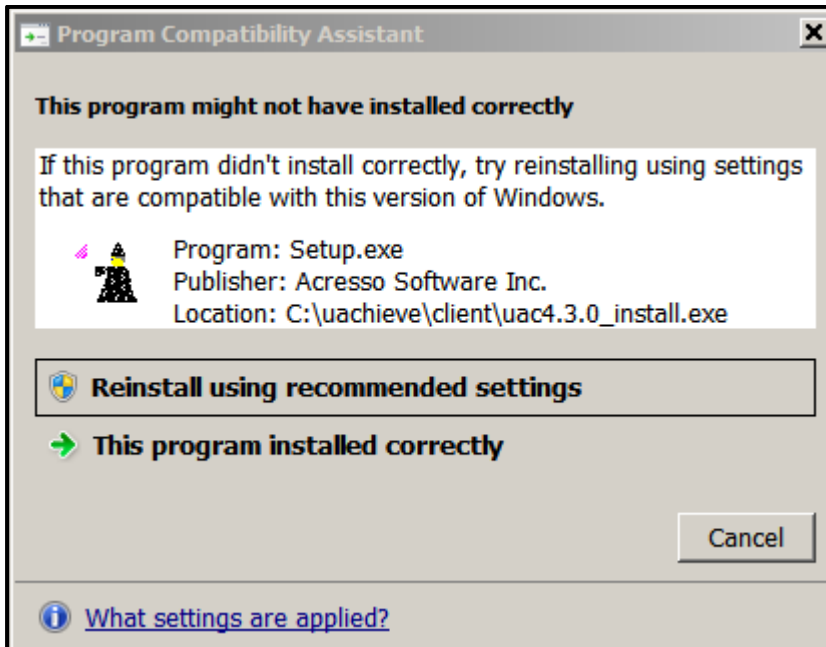

- Accept the default folder – Select 'Next'
- The installer will begin.....

- Once complete, you'll get this window. Select 'Finish'.

- In some installs, this message appears:

Select 'This program installed correctly'

**** Make sure you copy the Darwin.ini from your current installation to the new installation.**

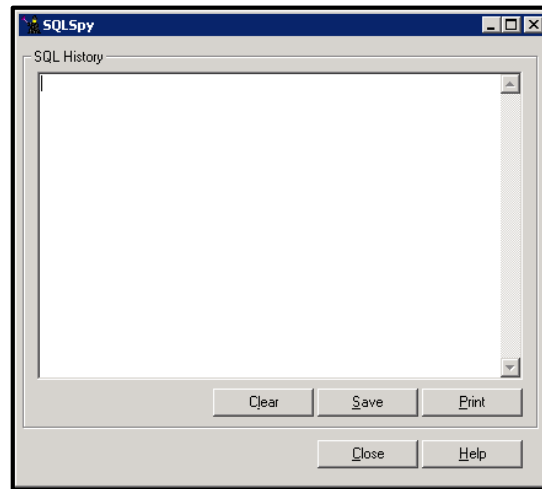

Old install location would be similar to this:

C:\Program Files (x86)\collegeSource\u.achieve 43

New install location:

C:\Program Files (x86)\collegeSource\u.achieve 43.0.2

- **Problem:**
SQL Spy window pops up for users once working in the u.achieve client software

- **Fix:**
Sign in to u.achieve client. On top window, go to Utilities and '**un-check**' SQL Debugging. Log out of the client and log back in. SQL Spy window will no longer pop up.
